

## **Presentation**

The “Société de Biomécanique” is a scientific society, created in 1976, which aims to encourage and promote research in the field of biomechanics.

Its role is in particular to encourage close cooperation between researchers, to promote the dissemination of knowledge and to contribute to the development of biomechanics research.

This international society (Belgium, Canada, France, Switzerland ... ) has French as usual language.

## **Becoming a member of the Société de Biomécanique**

The society is composed by active members and honorary members. To become a member of the **Société de Biomécanique** (SB), it is necessary to pay the annual fee:

- 40 € for researchers and academics
- 20 € for students.

The fee is included in the registration fee at the annual conference of the **SB**. If you join or renew your membership at any time during the year you become a member for the year.

Active members should conduct research or teach courses in relation with biomechanics.

Become a member of the SB, is strengthening its involvement in the community of researchers in biomechanics and participate in the dissemination of knowledge in the field. Being a member of the SB is an active part by voting at general meetings and / or electronic votes on issues related to the life of society.
